Tuesday, November 12, 5 to 6 p.m., Lewis Library 138

Technical staff from MITRE will provide an overview of current projects so students can gain an understanding of the technical skills needed in the field. They will also discuss what it is like to work for this nonprofit organization and the types of opportunities that exist. All students welcome. Refreshments will be provided. Space is limited, kindly RSVP at http://bit.ly/1fmbwKN.

MITRE, a not-for-profit organization that operates research and development centers sponsored by the federal government, works in the public interest at Princeton and throughout the country. Dr. Gerald Gilbert will describe the cutting edge quantum information science research taking place at MITRE’s Princeton University site and Dr. Sandeep Mulgund*94(MAE) will describe his work improving military command center operations around the world. Come learn how you can work on providing innovative solutions for the nation’s critical problems.
