Tuesday, November 19, 6 to 7 p.m., Lewis Library 120

Join three engineers from AppNexus as they talk about their projects and technical challenges they face.

**Talk 1:** Ad Serving Fundamentals & Challenges with John Wittrock, Ad Server Engineer  
**Talk 2:** Learning to Manage Technical Complexities with Joseph Huttner, DevOps Engineering Manager  
**Talk 3:** The AppNexus Data Pipeline with Aaron Dornbrand-Lo, Data Engineering Manager

Each talk will last about 10 minutes. Following the talks, there will be AppNexians present to meet you and answer your questions. Refreshments and sweets will be served.

Space is limited, kindly RSVP at http://bit.ly/1eN0IFr.

AppNexus is a technology company building today’s most powerful, open, and customizable advertising technology platform. At peak time, their ad server processes 1.6 million ads per second. Daily, they process 74 billion ads and generate more than 55 terabytes of data (to put that in perspective, the entire printed contents of the U.S. Library of Congress is roughly 10 TB). These numbers are constantly increasing, and we’re looking for passionate, driven problem-solvers to join our teams!
