Data loss prevention (DLP) is an important issue for enterprise message systems because of the extensive use of email for business critical communication that includes sensitive data. In order to enforce compliance requirements for such data, and manage its use in email, without hindering the productivity of workers, DLP features make managing sensitive data easier than ever before. This talk will give you an overview of DLP feature in Office 365 and a deep dive into document fingerprint technology.

Thursday, October 9 • 5 to 6 p.m. • Lewis Library 120

Hao Zhang joined Microsoft in 1999. He is a principal engineering manager working in Information Protection team under Office 365 service. In his 15 years with Microsoft, he has worked on various projects and technologies such as mail routing algorithm, SMTP protocol implementation, TLS and Kerberos authentication, Rights Management and other encryption technologies, data synchronization for the cloud, and data loss protection.
